Profile

Young enough to have crazy ideas, mature enough to use version control. I can make a functional e-commerce site in React, draw a cat riding a triceratops, and I can get you to read to the next paragraph.

Shortly after graduating from Reed College in 2017, I put my freshly-minted Sociology degree to work in Community Engagement, where I was the client-facing liaison between an irate public and myriad government entities. I'm making a move into the tech world because my whole life I've spent melding practicality and creativity - and I'm excited to see what I can do with a team.

Technical Skills

Full-Stack Development: MongoDB, Mongoose, Express, REST API, Heroku

Front-End Development: JavaScript E6, React.js, HTML5, CSS3, Redux

Project Management: Git, Github, Salesforce, MailChimp, SurveyMonkey
